It has so manfully thrown back the unjust accusation it has so promptly and trathfully informed the public of the rictous conduct of the Irish on every occasion, that we do not wonder the editor should "crow" a little over his great victory, and denounce all foreign military organizations in this country. We throw aside for a week one of our own articles upon the Irish to make room for an article in the Bee on the Governor's Reprimand of the Irish Military. It is a fine article and here it is.

The Naturalization Laws.

It appears that during the month of August, there arrived at New York over one thousand emigrants each day. At this rate by another year the number coming will doubtless reach two thousand; or perhaps more than that. The Bee says that under the present loose laws, which amount to nothing, any of these male emigrants of age, can be transformed into American citizens, and become at the first elections full privileged voters. We have been obliged to live here twenty-one years for a right to vote, are thus put down on a footing with men who put down on a footing with men who softs have read the Know-Nothings out smell freshly of the emigrant ship. The Boston Herald is noted for its liberality towards Catholicism and Irish Catholics. The editor, "Mr. Job Sass," always rushes to the defence of his Irish friends. The New Comers. In permitting foreigners to acquire the rights of citizens, it never was designed that they should after a residence of only few years, become our rulers. There has been no disposition heretofore manifested to exclude intelligent and worthy adopted citizens from a due share of pubers; but new comers are not contented o remain long enough to have their qualifications and merits developed before getting into office; they demand as a right, that they shall be promoted over the heads of others, and become insolent and factious if their claims are denied They have been too generally gratified, and even unnaturalized foreigners have received the preference in appointments ver old natives who have served their ountry in the field of battle. But these will now cease, and such men be compelled to stand back.

A "Mad-Stone."

Somebody in Virginia, has in his pos-session, an article called a "mad-stone," which he offers to sell, and which is said to be an infallible remedy for the bite of any poisonous reptile. If the fortunate sessor of the precious stone will come to Massachusetts and apply it to our Irish madmen, and if it cures them of Papal madness, we will sacrifice our right hand if models, we will sacrifice our right hand if we do not raise ten thousand dollars for the Virginian. But we fear this "infallible" remedy comes from that accursed "infallible" church of Rome! Is it not another Bambino? (Il Sanctissimo Bam bino)—the greatest Barnumbano, hum-bugano, of the nineteenth century?

Bogus. Americanism of the present day is not the genuine coin-it is a spurious metal-it is a bogus coin. It is counterfeit paper. It is a fraud and imposture. Will any one of our fifty thousand readers send to our editorial sanctum a few specimens of this counterfeit circulating medium, that we may have them engraved and pub lished as a warning to the public ?

The Father of Romanism in

America. To Lord Baltimore we are indebted for the germ of Romanism in the States, who first settled it in Maryland, where in 1810, it had come to be so popular, as well as in other sections of the country, hat it was deemed advisable at Rome erect the episcopate of Baltimore into n Arch-espiscopal See, and to establish four suffrage dioceses; namely: Bos-ton, New York, Philadelphia, and Bardslown, Ky.

Let it be remembered that the approaching co remembered that the approaching contest will not be between Americans and adopt-ed citizens, but between Americans and Irish Catholics alone. Neither Mr. Pierce, nor Father Campbell, nor Gov. Seymour, nor Mayor Westervelt, nor Gen. Cass, nor any others who have supported Catholicism against Americanism, Bedinianism against Republicanism, and courted Irish demagogues, bishops, and priests, will ever again be chosen by the sovereign people to serve the country in any capacity.
